

# 10 REASONS FOR USING SENSÉ

By: Bea Kinnear

## Sensé

- 1- Liquid Crystal Self-Preserving
- 2- Sunscreen Protection for wrinkles & skin cancer
- 3- Addressing Acne Issues
- 4- Regenisomes
- 5- MMP Inhibitors
- 6- Antioxidant, vitamin packaging protection. All containers are tubes and opaque for protection from oxygen and sun exposure.
- 7- For full benefit only small amount required.
- 8- Clinical Tests on all products.
- 9- Non irritating delicate fragrance. Special formulated fragrance you only find at the end of each product ingredient list, meaning it is the smallest ingredient in the skin care formula. The exception is the Eye Nourisher that contains no fragrance for eye protection.
- 10- Scientifically designed for skin health and nutritional requirements.

Sensé manufacturing conforms with pharmaceutical grade Good Manufacturing Practices. Which is beyond most manufacturing facilities for skin care products.

## All Natural and Organic Skin Care

- 1- Essential Volatile Oils and Alcohol preserving
- 2- Usually None
- 3- Usually None
- 4- None
- 5- Never advertise any
- 6- Most use jar containers. With open jars antioxidants can deteriorate when repeatedly exposed to air (oxygen) and sunlight.
- 7- Jar containers do not regulate amount used.
- 8- Most often never done by these lines.
- 9- Contains many Essential volatile oils that cause contact dermatitis and skin irritation. Fragrant oils are volatile oils and you find many different fragrances in natural and organic lines that are natural oils, but also the irritating oils.
- 10- The above undesirable points hinder skin health. Natural and Organic are not FDA regulated. Any line can use an organic label without having to prove otherwise.

*See Your Skin & You Fifth Edition for further information on these regulations.*
